

AUTOMATING YOUR STOCK MANAGEMENT

Continuous monitoring of tank levels for a Kuhlmann Europe-managed inventory

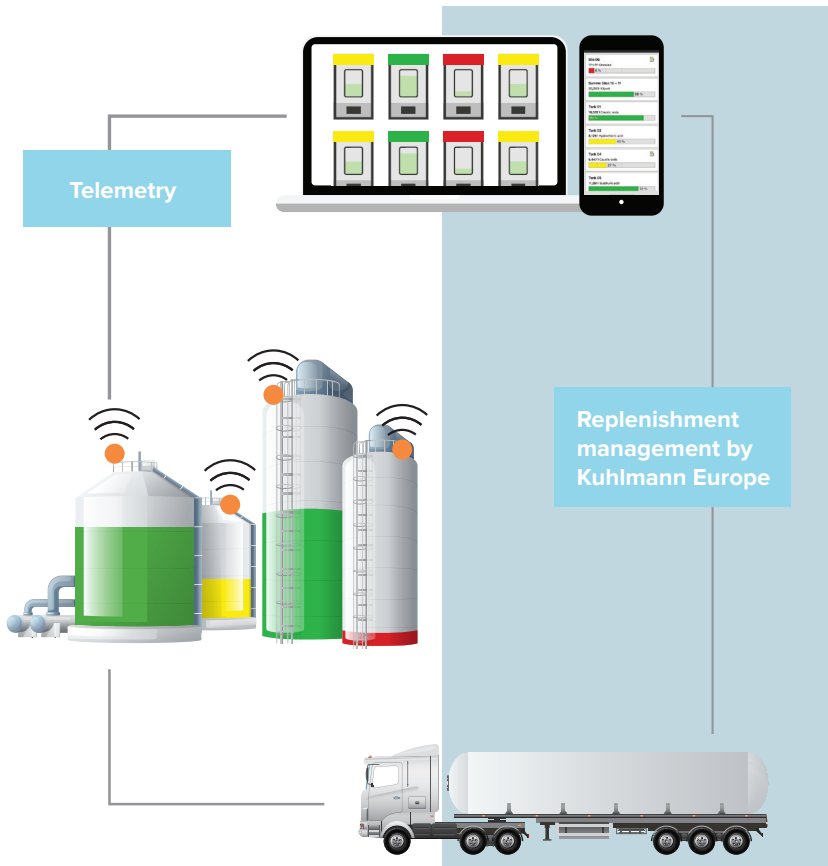

Discover simplicity of application and serenity in the management of your stocks. The Kuhlmann Europe teams ensure the management of your stock levels and plan the replenishments autonomously.

How does it work?

The level sensor installed on the storage tank provides data that can then be viewed remotely by the Kuhlmann Europe teams, which means simplicity in monitoring to ensure the required inventory level.

Benefits

Quick and easy to set up
Remote supervision in real-time
Dedicated personalized monitoring
Shared alert thresholds
Improved operational efficiency
Automated ordering process
